

Question's Answered !?!

On November 12, 2025, the integrity of the law was brought into question when I met with a newly State mandated attorney assigned to represent my case ! I only agreed to meet with this attorney because she put into writing, within her letter of introduction, that she been reading my blog and was interested on what I had to say about the use of artificial intelligence and on the charges of racketeering ... As of yet, the question of this attorneys integrity to up hold and protect the integrity of the law hasn't been answered, but I expect that to end soon ! Since the answer centers around whether she feels the law based on the withholding of exculpatory evidence can be violated or condoned ? To this point of time, the answer to that question has been a resounding Yes, as the withheld exculpatory evidence that denied me a fair and impartial trial has been oppressed and suppressed in order to keep the wrongful conviction brought against me to appear lawful and just ...

One of the reasons I want to use artificial intelligence is to answer the question of whether the withholding of exculpatory evidence can be condoned for any reason ? Since the artificial intelligence program will answer that question based on the letter of the law according to the Georgetown Law Journal, without bias or prejudice, it will determine whether my accusations of Racketeering within Florida's death penalty scheme has a foundation or legs to stand on ! It will also answer the question as to the integrity of this newly mandated attorney assigned to represent me !? Since if she chooses to go along with the past performances of her constituency and decides to oppress and suppress the overwhelming evidence of my having been denied a fair and impartial trial - the evidence of her criminal actions have now being recorded ...

I hope this newly mandated attorney appointed to represent me, understands the ramifications of how she proceeds from here . Because, I am not going to stop arguing my innocence of any kind of murder and that the withholding of exculpatory evidence denied me a fair and impartial trial !!!

Sincerely, Milo Rose : Over four decades falsely imprisoned on Florida's death row
