

Where's The Help ?!?

I need to argue the allegations of racketeering stronger and bring out the fact that if raised in the legal system it will bring an end to death warrants being signed and the abolition of Florida's death penalty scheme !!! By just bringing it to the courts will stop the executions - I think it may have to be raised in the federal court system and calling for mass indictments will definitely get media attention - I'm talking about hundreds of individual criminal indictments being severed on legal professionals due to their compliance of not recognizing the withheld exculpatory evidence in my case denied me a fair and impartial trial - its like the Congress people remaining the military personal of their duty to not obey an unlawful order - The same applies to the legal profession - none of them can condone the withholding of exculpatory evidence yet they allowed the fact my whole case is a farce and mockery of justice due to the withholding of exculpatory evidence being suppressed and oppressed throughout the entire appellate process of which their silence contributed to !!! The fact they didn't say anything and went along with the program doesn't relieve them of their oath's to protect the integrity of the law - there is no excuse for violating the law since no one is above the law - no matter how many violates the law - each person is held accountable for their own actions - a criminal enterprise is a criminal enterprise !!!

How do I find the help to vindicate myself when the people who say they oppose the death penalty won't offer me their support ?!?! I been having to build the appellate record myself outlining how I was denied a fair and impartial trial due to the failure of the State to turn over discovery - discovery that was exculpatory and discredited the enter case being presented against me - and due to it being withheld from me by the State - had me jumping up midway through the farce and mockery of my trial to shout to the judge and jury that I was being railroaded as my only defence !!!

Today over 43 years later, the evidence that proves I was denied a fair and impartial trial was and continues to be oppressed and suppressed because Florida has mandated by law, the attorney's assigned to represent me and they have wantonly denied me actual representation - causing me to try to point this fact out to the courts - without positive results - except that by trying to correct the injustice I suffer - I succeeded in building a record pointing out the abuse of the law I suffered - due to being falsely represented before the courts and all allowing the facade of justice to continue unimpeded except for my recorded protest - Which now points to overwhelming evidence of Racketeering due to the collective actions by all involved ...

The time to come forward and offer me support to argue my case before the courts of public opinion is over due - as death warrants continue being signed and carried out at an alarming pace ! Once I reach the courts of public opinion and social media brings the evidence of

racketeering in my case to light - all executions within Florida will end, since the system will be forced to correct itself as it answers for its misconduct amounting to criminal behavior ...

Okay - people, I am putting myself out there - am I, a fool to seek the support of the courts of public opinion to bringing to light the criminal behavior that has kept me falsely imprisoned for over 43 years ? Or are those of you that claim to opposed the death penalty negligent in not coming forward to challenge Florida's corrupt death penalty scheme that my case brings to light ??
