"WHY SO LONG?"

By Ronald Wayne Clark Jr.

To those who ask why so long on these executions? I ask the question, why at all? Cause let's face it, this is not justice. Its not a deterrent. And its not applied equally to the worst of the worst. I can show you case after case of inmates serving life sentences, that have cases where your scratching your head, looking at a horrific case that's far worse than the men their executing.

States are wasting billions of dollars killing men and women under the false pretense of Justice!

Tennessee is going to murder a woman tonight in there death chamber. A woman who over three decades ago, as an 18 year old child, teenage girl, who had a scientifically undeveloped adult brain, committed a horrific act. I'm not trying to justify what she did. I'm trying to get you to justify what your doing. Because what your doing tonight, is the most sick twisted form of premeditated murder there is! And your doing it under this guise of Justice! And its not justice, its a blood thirst vengeance to commit homicide for homicide!

You want to murder an 18 year old teenage girl who undoubtedly had a mental breakdown to have committed a murder! Cause let's face facts, a sane person is not going to kill another human being.

Which points the finger directly back at you. See my point? Maybe its you who need's help in getting past wanting to murder your fellow man or in this case woman. Maybe its you in society who has been brainwashed to enact hatred and vengeance on your fellow man under the guise of Justice? Maybe its you that needs psychiatric counseling for cheering on the death and destruction of a human life? Maybe its you who need's to find peace, mercy, forgiveness and God? Because supporting governmental murder's under the false pretense of Justice is an evil act of pure deception! Because murder by any other name is still MURDER! And only sick twisted mentally ill people, who are needing psychiatric treatment, kill other human beings. So if your still hell bent on these state sanctioned premeditated homicides, you really should see a psychiatrist, because there's clearly a deep seeded hate in you that requires counseling. God bless you.

Sincerely Ronald Wayne Clark Jr.
