

In The Midst of the chaos

Remember always keep your focus on what is important.
If I can survey 1,000 of people, what is their ~~con~~ concern?
The answers to their problems are right there. Is times
are hard? I understand the government is failing Americans
and other country (ies). God is greater than all the noise
and political pollution in the air, people.

Every situation I feel has ~~solution~~ a solution. Some solutions we
may not like, but it's a solution to the problem. For instance, I have
not had a paying job in 29 years because I been incarcerated, but I
will settle for two minimum wage jobs right now, even though I
have degrees of higher education.

So think about Is times really hard or society don't want to
settle for the less because we always want the best or we don't
want it at all. Selfishness, can keep people cripple in a hard place.
So ask yourself am I in hard place because of me or the government at
fault?
