When the budget don't fit Any More
(Our agenda - Society"

Many people deemed that inmates are not to be heard because they have committed a crime. But who knows better than the people on the outside looking in. Our society has turned into a lock them up and throw away the keys, our society has turned into wait until something happen drastically and then we will take action. ((Why must society wait until a tragedy happen?

- The society wants to enforce curfews etc. when children under age should not be roaming around no hour. I remember the times where the adult of the house would not permit such behavior, I know in my family, the adult would chatise us for hanging out late,
- Now you can not chatise child, you have to worry about Dfacs and the laws enforcement coming to arrest you for child abuse because children has gotten hip that you can keep the older people and their parents at bay by doing this. So no chastisement in the home is "why our children in society is taking over"

So the problem is the parents in some ways: what is going on in that house? How do they view discipline? Was they chatise when they was younger? Are the parents scared to chatise because its so easy to go to prison for child abuse? They are letting society run their homes?

Is their a ~~economical problem~~: where the children live in a area that is poor. Nobody gives them anything to do? a [redacted] predominate race or gender gets everything. The parents in prison, they in foster care, on drugs OR just don't care about their children. Its hard for certain races or gender to succeed in that area because their are certain strikes because of who the child or children belongs to, The all in all their is no [redacted] hope for the child or children.

Is their a listen[redacted] and connecting issue: when I was growing up my parents and elderly family members would monitor the type [redacted] of music, video and movies I [redacted] encountered. Also who I hung around. Because of the fear society has placed in parents, grandmom, etc. this is not happening often enough, if it was we would not have to worry about school shooting, mass shooting etc.

How we view society and what we allows is how we handle our problems? Many things wouldn't be a problem, if would have something in place already. We got to learn how to flow with the Climate of society. The best teacher is learning from other communities. When something happen in another State or Community. are you sitting around talking about it or are you the one that says lets prevent such acters in this State or Community. "Its called fire proofing your area."

How is this subject including in other topic "when the budget don't fit Anymore "Our Agenda - Society"

Notably that Georgia has a Probation and Parole problem. For instance, I know a lady in my church who committed a crime in the 1970s. She is still on probation. The question is " why didn't the probation officer get her pardon by now? Clearly, this can be reviewed as another form of oppressive behavior that is legalized by the State of Georgia Criminal justice system that is unjust. To point out if the parolee or probationer has not committed a crime in years it should be the duty of the Parole or Probation Officer to put in for a pardon for the Parolee or Probationer. To emphasize Some parolee or probationers' in 1970s, couldn't read or write because of their educational level. "Nobody can assume that everyone knows everything. But we can support that accountability is everything When it comes to equality and liberty of people.

Expressively supporting fairness all the way across the setting of Criminal justice system in Georgia. I been hearing alot of talk about "Repeated offenders" and feeling some of them as they continue to enter the system over and over. I never really understood why do you keep coming back to Prison. So I begin to do my own investigation by talking to the parolee and probationer violation. What I discover is the State of Georgia has a wasted tax payer dollar problem on hand. and the way they view this subject is leading to destruction of money in the government.

The root of the problem is! Why do people keep violating probation and Parole? In the State of Georgia? On the positive side some people complete with success, while on the negative side others are destine to come back into the prison or Jail or boot camps. Today we want to deal with deception of Probation and parole.

I want to put it another way so my viewer can understand in a different way that society and Criminal justice system had painted it. Many people in society knows who are on Probation or Parole - evil people often ride out on others weaknesses.

I have a cousin that got out parole from another crime she actually committed. She did her time in prison, and was released successfully. The people in that community knows why she went to prison. A girl who had a issue with my cousin before she went to prison, suddenly came on her property to fight and argue with her. My cousin repeatedly told her to leave. The individual hit my cousin first on her property. My cousin had to defend for herself because the girl had a weapon. She had no time to call the police. Even so if she did have time to call the police, she would have been deemed as the perpantrator off the rip. Because she already been in prison for murder. In a lifer parole their is a clause that says they are dangerous even though the lifer make parole. The County gave my cousin new charges of aggravated assault and violated her parole. The State of Georgia made my cousin do 8 more years currently at a halfway house. What about the girl who started all this by coming on her property? "Was never charged"

Second Case: This girl was a friend to my co-worker, she started going with the Co-worker husband. She knew my co-worker was on parolee for Shoplifting. This girl ~~keep~~ kept harassing my co-worker so she could send her back to prison so she could have the husband. She Stage a fight in the mall. Both fought, my Co-worker was violated and sent back to prison while the girl [redacted] remains free with the girl husband but she was fighting as well but never was charged even though the girl started.

Nobody should be set up to come back to prison, because somebody knows you on Parole or Probation. Parolee and Probationer should have the right to protect themselves. Another key point, people in Society can be ruthless if they know you are on Parole or Probation. Both parties should go to jail not just the one who is a probationer or parolee because the Courts wants to paint a picture that probationer or parolee are nothing but a problem because beside they are been in the system before or over and over. What if the Parolee or the probationer was not the problem. Nobody chose to assess their situation the Correct way without judging them. Sometimes people can paint a [redacted] deceptive picture of probationer or parolee based on a prejudice and bias theory which is not right according to the law on the books. Something needs to happen to the Probation officers or Parole officers. This is another form of oppressive behavior.

"Recidivist"

Many judges are sending inmates back to prison for recidivist under their second offenses of the same charges. This is improper use of the laws in the State of Georgia. They are abusing their power as judges and prosecutors. Under O.C.GA 17-10-7(a)(b) and (c) but more so (c) the criminal justices has been riding out under this laws.

For instance I have had a bunkmate under r[redacted]t recidivist for her second Arson. Their is a clause in her sentence paper that states Pursuant to the holding of Georgia Supreme Court in Moore V. Ray decided May 18, 1998, offenders sentenced in accordance with O.C.GA 17-10-7(c) formerly O.C.GA 17-10-7(b) are not eligible for Parole. You were sentenced in the Superior Court of Doughterty County under indictment number 19R328 and that sentence is controlled by O.C.GA 17-10-7(c).

Therefore, you will not be considered for parole until your recidivist sentence expires as determined by Georgia Department of Corrections. I urge you to maintain excellent conduct so that you might be granted the privilege of a parole release when you are eligible for consideration on October 14, 2028. This individual pleaded guilty by mental illness. This happen under Judge Willie E. Lockette and District Attorney Edward Gregory.

This unprecendent recidivist is very void: Under the provision of subsection (d) of O.C.GA 17-10-7 A case: fuller's Apr 29, 1983 Conviction counted as one prior felony entered a plea of guilty and was sentenced on December 29 1996, cannot be counted as a prior felony conviction for purposes of recidivist sentencing. Since the State failed to prove that fuller had three prior felony convictions as measured by the terms of O.C.GA 17-10-7(d), the recidivist provisions of O.C.GA 17-10-7(c) did not apply. Accordingly, the [redacted] portion of fuller's sentence indicating that he was sentenced under the recidivist provisions of O.C.GA 17-10-7(c) and that he is ineligible for parole is void and must be vacated.

The remaining portion of the sentence is affirmed. The case is remanding for resentencing indictment number 19R328 is the same as fuller case, the remedy she has is when a court imposes a criminal punishment that law does not allow, the sentence is not just an error it is void. Humphrey V. State, 297 GA 349, 350, 773 SE2d 760 (2015). An attack on a sentence on the ground that is imposed a punishment that the law does not allow may be made at anytime by means of a Motion to Vacate a void sentence. Rooney V. State, 287 GA. 1, 287 GA. 1, 2, 690 S.E2d 804 (2010).

Indictment 19R328 filed her Motion to vacate, Albany, GA. They denied her Motion. Comparatively, many probationer or Parolee can testify that they just have not had the success of Correcting the damage that many Judges and district Attornies has made in these small areas, just to name a few of these cities, Albany (Daugherty County, Bainbridge (Decatur County), Colquitt (Miller County (Blakely, GA). These are some of the hardest cities to practice your Post Conviction Motions. They feel once they sentence you that is it because they believe in trying to save the county (Money) for many, years they have escaped the bullet of allowing Post Conviction Motion in the court to have a hearing because each individual got what they deserve. I feel they Should be punished for their corruptions in these Counties.

(Technicalities)

I have heard many horror stories about Probation and Parole officers. Another point often over looked, that many probation and Parole officers has nasty attitudes, waiting to send one back for violation. Which Should be adjusted because you can correct a behavior without being rude. Therefore, people in a profession should always Conduct themselves with a Professional attitude even when the Parolee or Probationer is wrong.

In my view, I feel that unwise choices are wasting tax payer money when it comes to Parole or Probation violation.

For instance, dirty urine failed a drug test: By sending them to prison, how is that help the Probationer or Parolee? Especially now that drugs are in the jails and prisons! Because of the Corruption within the system and communities. The opposition is that system only wants to deal with symptoms - which is the drug use. The question here is why are you using drugs?

In reality most addictive/compulsive behavior come through trauma, So why are we not dealing with the trauma, which is the root of the problem: My personal testimony is I was addicted to (opoid later) - Because I wanted to numb the pain on the inside because I had been molested thrice times and raped. I thank God for his healing power that touched me on the inside. Cause of my healing on the inside from God almighty.

The drugs around me don't tempt me at all. However, many inmates are taking advantage of their addiction behind the wall-mainly meth. The State of Georgia does their inmates dirty. With this in mind, the do not pay their inmates, instead we do free Labor while they collect the money off of housings us. Secondly, they create a hostile environment with no hope of nothing better, by taking the little peak of light you do see. Committing Crimes behind the wall is wrong by the same token ask yourself "Why are things like they are behind the prison walls in Georgia?

How can tax payer money be spent wisely for drug programs that currently seem to be failing the addicts behind the wall and Communities? If the addict keeps failing drug test after test why keep sending them to a drug rehab - when that chair can be for Someone who has never entered a drug rehab. This type of person needs to be in a trauma center that can help them heal on the inside. Drug Rehab don't go deep enough for the help they need. Sending them to prison or jail is wasting tax payer money.

Jobs

Parolee or Probationer that can't find a job why don't the Probation or Parole officers have resources that help them. Some people need their Parole or Probation officers to help them especially if they been locked up for a while. Especially if a Parolee or Probationer been locked up in a hostile environment. Then they are released in a more shocking environment called Society which already have given the inmate a strike on their back because they are a convicted felony. Why don't the Probation and Parolee officers' have resources and take them to find a job or help them get into a reentry Center. Why continously send people back to prison once they immediately fail to do something. Some people do everybody involve a favor, commit a crime so they don't have to deal with the oppression from family, Society, or Parole or Probation officers. Stop setting others up for failure.

Shoplifting Parolee or Probationer- In the State of Georgia if you get three shoplifting offenses it turns [redacted] into a Felony. Why not send the violator to a therapy class that help them to over come this bad addiction by sentencing them to 2-5 years in the County jail, Detention Center or a boot camp. This Should not warrant a sentence of prison.

Relationship can paint a beautiful Picture until its too late to turn around and leave. Domestic violence can comes in all kinds of shape but what if you become the victim of the circumstance and still face physical abuse because your the one incarcerated. Lets Look at the clause Domestic Violence in a different manner; Likewise with the Spirit of oppression

Parolee or Probationer- that face domestic violence. Currently there is a liver that has been violated she committed a murder when she was 14 years old. She served 20 plus years. Gen X got out started a family. Now has a son. She was doing good at least she thought. Met the love of her life. Until one day he became abusive and lied on her because She was on parole. The abuser her baby daddy made he the aggressor when the police was called. Do I think Gen X should be back in the penal system absolutely not. However, the clause in the liver parole that She is considered dangerous because of the one crime She did commit, murder. Now her only child, son is without her while dad is out their doing the same thing to another victim. When She went before the Judge, all they was concerned about the one crime She did commit, murder. They didn't care how good She was doing and how long she had not been in trouble, Gen X had all her reports where she went to the hospital etc. all the reports where the baby daddy choked her repeatedly. Police Reports on him. Instead they [redacted] sent her back into the prison hostile environment. Why should Gen X have to go through all the red tape of bill 582. When Gen X was the battered woman and her parole was violated with new Charges. Waste of taxpayers money.

A comment from a current inmate: I was blind with love by marriage at a young age with a man that had a very deep past that was unknown. When I found out about his deep past I was distraught and then it was too late. Now its been 6 years later in the same institution without NO

address because I am a sex offender, because of my ex husband past. Parolee or Probation - Can't find a parole address past her TPM because she is a sex offender. This the normacy for a sex offender (1) Can't find a place to stay still in the system past their TPM, (2) can't find a place to stay even though the maxed out (3) I had to move instantly or else I was coming back to prison. Often times I've seen people parole out to homeless shelter or living under a bridge.

With this charge comes great expectation that are hard to meet in some instances (1) Many people on a life time of registration (2) have to be so many ft or yards away from children (3) others had to neglect their family altogether. Even though the laws of land has straighten the legal language up of who is a predator and who is not. The judges and district attorneys are treating everyone the same, for instance, this young girl is trying to go back to Court and get this sex offender Registration off her. She has done all her groups and divorce her husband.

I have a problem with this sex offender Registration and who is the predator, for instance, in my own life, my stepfather molested me from 9 to 13 years old. At the age of 13 years old I actually had sex with a 27 years old man because I was trying to run away from that home. One situation was molestation. In the State of Georgia 13 year old sleeping with a 27 year old is Statutory Rape. even though it was alright on my end but if my mother would have find out, she could have press charges against this guy.

I feel that needs to change because I had a teenager friend that married another teenager that was older than she was with a signature of a parent because child was involved. Some things are not sex offenses, my great grand mother got married when she was 13 years to my Great grand father in 1900s. Every person is not a predator. The action of our judges and district attorneys need to start showing they know differences according to the laws on the book. What Class are these people?

Probationer or Parolee another issue, some find themselves in situation where they get to take up more from a situation that can cause a violation. I've heard many probationer and Parolees establish that they let their Parole or Probation officer know what was going on with them. Instead of trying to help them. They violated them anyway, in sent them back into the system. A purposefully wasting money without a care in the world as long as we push the agenda for Society to lock up and keep them their.

Even though the Streets are no safer and the crime rate is never low because the Streets are safer. Society is screaming for safety, which never seem to come any faster. As the world and our institutions and our governmental system are spiraling out of control, ~~for help~~. wanting help, but who is their to answer the call of duty, but when they do answer, it end up ~~been~~ being a new problem or no solution to the problem. Now we find ourselves going in to circles over and over circles.

– The Argument –

Why waste Taxpayer money on Probation and Parole violation Sending them back to prison under a technicality when their can be other option for them, significantly, there are plenty of inmates waiting in the counties jail with lengthy sentences waiting to be transported to the State Prison to start their time, This is more important, because daily somebody is getting sentenced in the State of Georgia. The overcrowding of jail and prison population is very overbearing for the people who has to overseer these inmates. If you don't think about the inmates think about the staff. 145 it stand their are more inmates than staff. So think about them in your decision makings in the Courts and the laws of the land
